

All Social Platforms: Tik Tok, Instagram, Youtube, Facebook

They will all funnel into each other. Youtube being the major driving force because this is where all the long form content will be posted.

- Behind the scenes
- Outtakes from the show
- Interviews
- Backstories from the contestants
- The full performances from the musicians on the show
- Funny moments

This will help the audience stay engaged outside of the show. A place for the audience to be part of the community and engage and fall in love with each person on the show. To make them more invested in the show.

The objectives of the socials platform campaigns:

- Creates a strong fan base because of the connection they feel they have with each character in the show. It allows them to have that closer and “deeper” feeling relationship with them outside of watching them on their favourite streaming platforms
- Proven analytics - this will help us go to other streamers/ platforms for future deals to show that the IP works and there is a proven fan base for this IP.
- Drives traffic to the show on platforms
- Drives traffic to products
- Drives traffic to brand deals
- Monetization through youtube ads, brand deals, product sales
- New market analytics - Test and launch into new markets because we will have the analytics to prove that each region wants this show, so we go into proven and tested regions prepared instead of blindly guessing
- Talent Recruitment - This will be huge because we will be able to save costs with recruitment in the future (Coaches, talent, etc)
- Feedback from audience - helps us understand what the fans want to see because customers are the most important part.

Funnel socials into email lists so they we can nurture them into warmer leads for brand deals, side sells, keeping them up to date for the show releases.
